*\*Nucleus Hive*

*The swarm settled in the hedge on the other side of our home apiary*

*Dad collected them using a Nucleus hive\* and took them to the new apiary - but they swarmed again!*

## TULIP MOVES IN (11TH MAY 2020)

---

- Moved to Brackendale three weeks before
- Ensures new foragers when moved back to Brundall - so they don't return to the original hive location!
- Tulip is our oldest Queen with a red mark - 2 years old from 2018!
